

Landfill Technical Sessions

- **Session 1** focused on the transition from M2M to GMI's expanded scope including methane avoidance, alternative waste management strategies (e.g., Europe's experience), and incentives for clean energy (e.g., CHP credits in Finland)
- **Session 2** focused on opportunities for waste management and GMI in NAMA's (e.g., MAPs), including overview of NAMA's and specific country examples (Colombia's LCDS, Serbian NAMA inclusion of waste sector)

Landfill Technical Sessions

- **Session 3** focused on the financial and technical considerations including a Ukraine LFG case study, energy from wastewater, and improved landfill and LFG operations (e.g., LFG systems O&M and leachate management)
- **Session 4** focused on the Polish experience in the waste sector (e.g., Poland has over 80 LFG electricity projects underway in last five years due to favorable green tariff)

Landfill Subcommittee Meeting

- 40 attendees and country updates from 13 Partners
- Landfill Subcommittee name change due to transition to GMI and expanded scope
- Discussion about long-term planning goals
- International best practice guide update
- Decision on Co-Chairs
- Planning for Expo 2013 including developing technical agenda and project ideas
