Methane to Markets
Subcommittee webinar meeting
20 June 2011

New coal handling and preparation plant

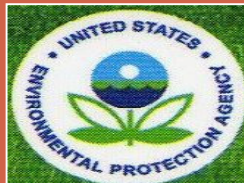

❖ **Mongolian Mining Corporation, Mongolia's largest producer and exporter of high-quality cok-ing coal, has completed construction of its new coal handling and preparation plant with processing capacity of 5 million tones per year.**

❖ **Meanwhile, the second and third phases of the plant, each with annual capacities of five million tones, are expected to become operational in the third half of 2011 and at the end of 2012, respectively.**

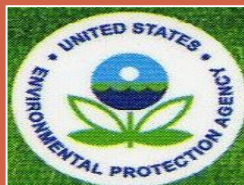

Methane to Markets
Subcommittee webinar meeting
20 June 2011

Mongolian Methane to Market Partnership Association (3M PA).

3MPA has been established in March, 2011, purpose of which are:

- to create a voluntary, non-binding framework for in country cooperation to reduce methane emissions
- to advance the recovery and use of methane as a valuable clean energy source to increase energy security
- to enhance economic growth, improve air quality, and improve industrial safety.
- to identify and promote areas of bilateral, multilateral, and private sector collaboration on methane abatement, recovery, and use in the areas
- to Develop improved emissions estimates and identify the largest relevant emission sources to facilitate project development.

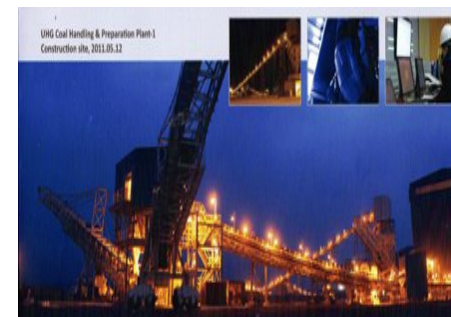

Methane to Markets
Subcommittee webinar meeting
20 June 2011

Partners of 3M PA are

- Government agency
