

Methane to Markets

On March 26 and 27, 2009 Methane to Markets held a Landfill Gas (LFG) workshop in collaboration with SEMARNAT, the Secretariat of Environment and Sustainable Development (SEMADES) of the State of Jalisco and the Guadalajara Autonomous University (UAG) in Guadalajara, Mexico. The event was held in the Auditorium Dr. Ramon Garibay of UAG.

Approximately, 100 people attended the workshop. Among the attendees were federal, state and city environmental officials, consultants, project developers, and students. The workshop's objective was the presentation of the new version of the Mexico Landfill Gas Model. The agenda was as follows:

- Inauguration Ceremony - Lic. Antonio Leaño Reyes, University President; José de Jesús Alvarez Carrillo PE, SEMARNAT Delegate; Mrta. Martha Ruth del Toro, Secretary of Environment and Sustainable Development
- Panel "Methane and its Global Warming Effects" - Moderator: Dr. Mauricio Alcocer, Dean of the Renewable Energy Master's Program. Presentations by Edgar del Villar, SEMARNAT; Victoria Ludwig, EPA; and Martha Ruth del Toro, SEMADES
- Landfill Gas Collection Systems - Jose Luis Davila, SCS Engineers
- Landfill Gas Utilization - Chad Leatherwood, SCS Engineers
- Introduction to the new version of the Mexico LFG Model - Alex Stege, SCS Engineers
- Hands-on Training on new version of the LFG Model - Alex Stege and Jose Luis Davila, SCS Engineers
- Site Visit to the HASARS Landfill CDM Project

Methane to Markets thanks SEMARNAT, SEMADES, the UAG, Tecnicas Avanzadas Medioambientales and the HASARS Landfill for their support on the preparation of the workshop.
