The International Landfill Database – An on-line resource to support the Methane to Markets (M2M) Partnership Landfill Gas Technical Subcommittee in its efforts to promote the development of LFGE projects. It is a voluntary data collection and reporting tool for information critical to project developers, investors, and policy makers. The application is web-based and relies solely on M2M partner countries, its network partners and affiliates to provide landfill specific information.

In this presentation we will learn how to...

- Create a user and log onto the web site.
- Search for a landfill, view and export details.
- Submit a landfill and access on-line help.
