

# Methane to Markets

---

**Partnership Update  
Oil and Gas Subcommittee Meeting  
Villahermosa, Mexico, April 27, 2006**

Erin Birgfeld, Head  
Administrative Support Group (ASG)

## Overview

---

- Steering Committee Decisions and Outcomes from November 2005
- Progress since Buenos Aires
  - Partnership Expo Taskforce
  - Tracking M2M Projects
- Charge to Subcommittees and Goals for this meeting

## Steering Committee Decisions and Outcomes from Buenos Aires

---

- Subcommittees to further refine Action Plans
  - Living documents to be updated at each subcommittee meeting
  - Provides guidance for activities for Partners and PN members
  - Focus on developing actions and projects that respond to country specific circumstances (e.g. specific barriers to projects in Russia, Mexico etc...)
- Methane to Markets Project and Technology Expo in 2007
  - Goal is to help catalyze near-term project development
  - Taskforce convened and developed recommendations for the Steering Committee
  - Michael Layer, Canada; Roger Fernandez, U.S. participated on behalf of the Oil and Gas Subcommittee
- Develop and implement a tracking system for project and activities under the Partnership
  - Results and outcomes must be tracked

## Partnership Priorities for 2006

---

- Implementing concrete activities in each sector and in each Partner country
  - Implementing and Updating Sector Action Plans
  - Expanding Action Plans to include country specific information
- Identifying near-term opportunities to develop projects for investment and implementation
- Expand the Project Network to include key organizations from the private sector and the investment community
- ***Partnership Expo for 2007***
- ***Tracking Projects and Accomplishments***

## Partnership Expo Taskforce

- Taskforce met 3 times via teleconference
  - Participants included representatives from each subcommittee and any country that wished to participate
  - Roger Fernandez (US) and Michael Layer (Canada) represented Oil and Gas
- Taskforce issued recommendations on April 4, 2006
  - Included a charge to Subcommittees
  - Recommendations were adopted on April 20
- The government of China has offered to host in Fall 2007 (Date and Location TBD)
- Event Goals
  - Showcase specific projects for investors to consider
  - Showcase methane capture and use technologies and services
  - Dialogue on the key technical, policy, financing, and regulatory issues related to project development in each sector

5

## Partnership Expo Taskforce (con't)

- New Title: *“Partnership Expo: A Forum for Projects, Technology, Financing, and Policy”*
  - reflects broader focus beyond a simple project expo
- The Expo will be 3-4 days and include a number of elements
  - Sector-specific conference tracks that highlight and explore key technical and policy issues for each of the four sources of methane, as well as cross-cutting themes which need to be addressed, and which could feature project case studies, regulatory approaches, financing mechanisms, and discussions of key barriers.
  - Exhibition booths for technology vendors, those with project opportunities they wish to highlight, financing organizations etc...
  - Opportunities (such as panels or short presentations) to showcase specific projects that need financing.
  - Subcommittee meetings and Steering Committee meetings

**\*\*\* The Partnership Expo will be the premier M2M event over the next year and can act as an opportunity to move projects and activities forward**

6

## Partnership Expo: Charge to Subcommittees

- **Actively identify, solicit, and promote projects to feature at the Expo**
  - Actively solicit and identify high quality projects and technologies for presentation.
  - Subcommittees should list specific action items that each Partner can take to support project development for the Expo. For example, (e.g. providing funding for pre-feasibility studies, surveying countries for project opportunities, utilizing the project idea submission form to identify potential projects). These items can be incorporated into the Sector Action Plans.
  - *The Oil and Gas sector is somewhat unique in that methane emissions reduction activities will likely include a variety of actions such as implementing operating methodologies and utilizing various technologies. Thus, this subcommittee should focus on identifying and showcasing these types of activities for the Expo.*

## Partnership Expo: Charge to Subcommittees (con't)

- **Utilize on-line submission form for projects to be featured at the Expo**
  - An on-line project submissions form that has already been approved by the Partnership be the basis for submitting projects for inclusion in the Project Expo..
- **Develop Additional Guidance for Project Submissions**
  - Subcommittees should develop guidance for the additional information necessary for financiers to seriously consider investing in a project.
  - The guidance should be extensive enough to ensure that projects are adequately characterized and ready for investment.
  - Subcommittees should plan to provide their final guidance document to the ASG by the end of July 1 2006 for posting on the methanetomarkets.org site.

## Partnership Expo: Charge to Subcommittees (con't)

---

- **Continue Participation in Expo Taskforce**
- **Planning for Expo**
  - Subcommittees should plan to develop a thematic conference track for their sector. Subcommittees may wish to discuss key sectoral themes, issues, and barriers that they would like to address as a part of the Expo
  - Subcommittees will be asked to develop an agenda for approximately one and half days of sectoral forum discussions, as well as to input to any cross-cutting elements agreed as important.

## On-Line Tracking System for M2M Projects and Activities

---

- **Goals**
  - Project Ideas matching with developers
  - Tracking Methane to Markets Activities
  - Tracking projects and activities to highlight in the Project Expo 2007
- **ASG Developing on-line system now**
  - Launch by Fall 2006
  - Encourage countries and PN members to include all methane project related activities
  - Will allow us to track the impact of the Partnership on project development, capacity building etc...

## Key Items for Subcommittee Action

---

- **Update Sector Action Plan**
  - Move from global to country specific focus to encourage project collaboration amongst Partners and Project Network, targeting concrete activities (Incorporate Country – short, medium and long term goals)
- **Identify Partnership Expo Activities and include in action plan**
  - Optimal focus to create a valuable event for the oil and gas sector
  - Activities to promote the event
- **Tracking Projects and Project Ideas On-line**
  - Actively track projects in coordination with ASG
  - Encourage use of Project Submission Form
- **Outreach and Communication or Other activities IDed at this meeting**
  - Present to key groups and organizations to recruit Project Network members
  - Scheduling activities, workshops, etc., to ensure broad Project Network participation in Subcommittee meetings
