

**Methane to Markets Partnership
Oil & Natural Gas Subcommittee
Aberdeen, Scotland
1 May 2007**

9:00 – 9:45: Welcoming Addresses

- United Kingdom Government Representative
- Chairmen Kaplan Basniev (Russia), Javier Bocanegra (Mexico) and Vice Chairman Michael Layer (Canada)
- Introduction of attendees

9:45 – 9:50: Approve Agenda

- Oil and Gas Subcommittee representatives

9:50 – 10:00: Oil and Gas Subcommittee Vision

- Confirm the overall Methane to Markets Partnership goals and specific mandates to the oil and gas subcommittee as discussed in the Tomsk, Buenos Aires, Villahermosa oil and gas subcommittee meetings and Rome steering committee meeting

10:00 – 10:45 Oil and Gas Sector Methane Emissions Reduction Project Progress Reports

- Each country representative and project network attendee that chooses to do so shall briefly update the group on actual concrete activities related to methane emissions reduction project development since the Villahermosa, Mexico meeting

10:45 – 11:15: Tea Break

11:15 – 12:15: Nodal Analysis – Michael Layer, Environment Canada

The objective of this tool is twofold: 1) to provide an oil and gas methane emissions reduction project information management tool and tracking utility that may be incorporated into the international Methane-to-Markets Partnership web site; 2) once projects are added to the tool, its core purpose will be to provide government decision-

makers, industry regulators, technology vendors, industry practitioners and capital market fund managers with a convenient interactive means of identifying methane emissions reduction project opportunities and learning about the oil and gas industry and the types of cost-effective methane emission reduction opportunities that the industry offers.

A draft version of the interactive software will be demonstrated to the committee and opportunity for discussion and comment will be provided.

12:15 – 13:45: Lunch

13:45 – 15:30: Beijing Partnership Expo

- Goals of Beijing Partnership Expo
- Target companies and individuals that the subcommittee should encourage to attend the Partnership Expo
- Discussion and agreement on draft technical workshop agenda
- Discussion of Country Expo participation

15:30 – 16:00: Tea Break

16:00 – 17:00: Technical Topic – Focused Case Studies

- Optical imaging
 - What is optical imaging in regard to methane emissions
 - How is optical imaging applied to the achievement of long-term methane emissions reduction activities

17:00 – 18:00 Subcommittee Meeting Goal Recap

- Specific tasks that meeting participants, companies and countries agree to accomplish between Aberdeen and Beijing that will lead to actual methane emissions reduction project development
- Discussion of agenda topics for oil and gas subcommittee in Beijing

18:00 – 19:30: Dinner
